Portfolio & Writeups: <https://www.psykick.uk>

Github: <https://github.com/psykick-duality>

OSCP-certified Penetration Tester with 3+ years of experience delivering end-to-end assessments across web, network, API, mobile, and cloud environments for enterprise clients. Specialized in application and infrastructure exploitation, Active Directory attacks, and automation using Python, PowerShell, and Impacket.

Published detailed exploit writeups and privilege escalation chains on [psykick.uk](https://www.psykick.uk), demonstrating advanced attack simulations and remediation guidance.

Developer of Pentest Assistant, an AI-driven tool that integrates reconnaissance, scanning, and report automation, reducing manual effort by 50%.

Experienced in manual and automated testing, red team simulations, and cloud configuration reviews aligned with MITRE ATT&CK, OWASP, and CREST methodologies.

Recognized for a collaborative, client-focused approach, clear communication, and continuous professional development toward CREST Registered Tester (CRT).

Professional Experience

Bug Bounty Hunter

September 2023 - Present

- Conducted **independent web and API vulnerability research** for multiple enterprise programs.
- Identified and responsibly disclosed **critical vulnerabilities** including **IDOR, SSRF, RCE, and authentication bypasses**.
- Performed **deep reconnaissance and chain exploitation** to demonstrate business impact beyond single-issue bugs.
- Developed **custom Python automation scripts** to streamline recon, parameter discovery, and payload fuzzing.
- Integrated bounty findings into personal methodology, enhancing **real-world exploit depth** for professional assessments.

Penetration Tester

Securin Inc., Chennai, India

August 2021 - August 2023

- Delivered **end-to-end penetration testing** across **web, network, API, mobile, and cloud environments** for Fortune 500 clients.
- Executed **red team operations**, achieving **25+ full domain compromise** via **Active Directory exploitation** and **privilege escalation**.
- Identified and remediated **20+ high-severity vulnerabilities** (Auth Bypass, IDOR, SSRF, RCE).
- Performed **secure code and configuration reviews** across **Windows, Linux, and cloud** systems.
- Developed **Python automation tools** and integrated **AI analytics**, reducing manual effort by **40%**.
- Delivered **executive-level reports and client debriefs**, translating technical findings into business impact.
- Supported **engagement scoping, QA reviews**, and internal process improvements to enhance testing quality.

Freelance Penetration Tester

, Chennai, India

January 2021 - August 2021

- Participated in **Bugcrowd and HackerOne** programs, responsibly disclosing **20+ vulnerabilities** (IDOR, SSRF, Authentication Bypass).

App Developer

Sarada Technologies, Chennai, India

July 2020 - December 2020

Designed IoT-based home automation app integrating AWS & RESTful APIs; early exposure to secure system design.

Education

Master's degree in CyberSecurity September 2023 - September 2024

University of Birmingham

Master's Thesis: *Integrating AI and Traditional Tools for Enhanced Penetration Testing: The Pentest Assistant*

Developed **Pentest Assistant**, a tool combining **AI** and traditional penetration testing tools (Nmap, Wappalyzer) to streamline security assessments.

Implemented features such as:

AI-powered vulnerability analysis for precise threat identification. **Automated report generation**, reducing manual effort by over 50%. **Intuitive UI** for both novice and experienced testers.

Conducted end-to-end **design, implementation, and testing** to ensure efficiency and reliability.

Demonstrated improved speed, scalability, and accuracy in penetration testing.

Bachelor's degree in Computer Science July 2016 - May 2020

SRM University

Key Skills

- **Domains & Methodologies:** Web, Network, API, Mobile, Cloud (AWS/GCP) | Red Team Operations | Active Directory Exploitation | OWASP Top 10 | MITRE ATT&CK | NIST 800-115 | PTES
- **Tools & Frameworks:** Burp Suite Pro | Nmap | Nessus | Metasploit | Impacket | Hydra | BloodHound | Mimikatz | SQLmap | Wireshark
- **Scripting & Automation:** Python | PowerShell | Bash | Automation for Recon, Exploitation, and Reporting
- **Assessment Areas:** Secure Code & Build Reviews (Windows/Linux) | Cloud Misconfigurations | Vulnerability Assessment | Mobile App Testing
- **Reporting & Delivery:** Executive Reporting | Client Presentations | QA Review | Scoping & Proposal Support
- **Research & Contributions:** Exploit Writeups | AI Tool Development | Continuous Threat Research

Projects & Research

- **Pentest Assistant (AI-Driven Penetration Testing Tool)** — <https://github.com/psykick-duality/Pentest-Assistant>
Developed a modular AI-powered penetration testing framework integrating reconnaissance, vulnerability correlation, and reporting. Reduced manual time by 50%.
- **Exploit Writeups & Privilege Escalation Research** — <https://www.psykick.uk>
Published detailed research on **full exploit chains and privilege escalation** techniques in simulated enterprise environments.

Certifications

Offensive Security Certified Professional

October 2025

Offsec
