

Dilip Prasad

PENETRATION TESTER

dilipprasad35@gmail.com — 07407 004 776 — linkedin.com/in/dilip-prasad — psykick.uk — github.com/psykick-duality

SUMMARY

CRT, OSCP and CPSA-certified Penetration Tester with experience delivering web, API, internal, cloud and Active Directory assessments for enterprise clients across UK, EU and US sectors. Skilled in full attack-chain exploitation, domain compromise, adversary simulation, recon automation and high-quality reporting tailored for engineering and leadership audiences. Adept at articulating business risk, guiding remediation and delivering measurable security improvements across the full engagement lifecycle.

CERTIFICATIONS

- **CRT** — CREST Registered Tester
- **OSCP** — Offensive Security Certified Professional
- **CPSA** — CREST Practitioner Security Analyst

CORE

Web & API Security • Active Directory Exploitation • Internal & External Testing • Cloud (AWS/GCP) • Red Team Support • Objective-Based Testing • Recon Automation • Reporting & Risk Communication • Attack Surface Mapping • Privilege Escalation • Pivoting/Tunneling • Vulnerability Chaining

COMPETENCIES

KEY

- Delivered high volume assessments across web, API, internal, cloud and red-team scopes for enterprise clients.
- Achieved **25+ full domain compromises**, identifying multi-stage AD attack paths and delivering complete remediation strategies.
- Reported **20+ critical vulnerabilities** (RCE, SSRF, auth bypass, IDOR) with detailed proof-of-concept and business impact.
- Developed Python/PowerShell automation tooling reducing recon and enumeration workload by **50%** across internal engagements.
- Published exploit chains, AD privesc research and cloud attack paths at psykick.uk.

ACHIEVEMENTS

PROFESSIONAL

Penetration Tester — Securin Inc
Chennai, India

EXPERIENCE

2021–2023

- Delivered full-scope **web, API, internal, cloud and mobile** assessments for US, EU and APAC clients using CREST/PTES methodologies.
- Executed complete **Active Directory attack paths** including Kerberoasting, AS-REP Roasting, delegation abuse, ADCS (ESC1–ESC8), ACL abuse, token forging and DCSync.
- Performed **lateral movement**, pivoting/tunneling (SSH, Chisel, Ligolo-NG), SOCKS relays, network segmentation bypass and evasive reconnaissance.
- Produced high-quality reports with technical detail, evidence, risk scoring and executive-level summaries.
- Built automation for recon, payload generation, enumeration pipelines and reporting workflows using **Python and PowerShell**.

Bug Bounty Hunter
Leicester, UK

2023–Present

- Identified and reported critical vulnerabilities (RCE, SSRF, IDOR, auth bypass) within private programmes.
- Conducted advanced reconnaissance, endpoint mapping, attack surface expansion and multi-step exploit chaining.

Freelance Penetration Tester

2021

- Performed web, API and infrastructure testing for SMB clients with actionable remediation and configuration guidance.
- Delivered the full engagement lifecycle: scoping, testing, evidence collection, reporting and client debrief.

Pentest Assistant — AI-Driven Assessment Framework
Python/PowerShell automation suite integrating recon, vulnerability correlation, note-taking and custom reporting templates.

Exploit Chains & Privilege Escalation Research
Published AD exploitation paths, cloud enumeration workflows and web exploit chains at psykick.uk.

EDUCATION

MSc Cybersecurity — University of Birmingham2023–2024

BSc Computer Science — SRM University2016–2020

TECHNICAL

SKILLS

MATRIX

Web & Application Security

- Burp Suite Pro, macro automation, Intruder optimisation.
- SSRF, RCE, LFI/RFI, deserialization, OAuth/JWT abuse, logic flaws.
- REST/GraphQL API testing: BOLA, authorisation flaws, rate-limit bypass.

Active Directory Exploitation

- Kerberoasting, AS-REP Roasting, constrained/unconstrained delegation.
- ADCS (ESC1–ESC8), certificate abuse, privilege escalation.
- ACL abuse (WriteDACL, GenericAll), RID hijacking, DCSync, Golden/Silver Ticket.
- Tools: BloodHound, Rubeus, PowerView, Impacket, Mimikatz.

Infrastructure & Internal Assessments

- Pivoting/tunneling: SSH, Chisel, Ligolo-NG; SOCKS relays; DNS tunneling.
- Enumeration: Nmap, masscan, CrackMapExec, Responder, Bettercap.
- Exploitation: Metasploit, manual RCE chains, Linux/Windows privesc.

Cloud Security (AWS / GCP)

- IAM privilege escalation, metadata exploitation, misconfigured storage abuse.
- ScoutSuite, Pacu, S3Scanner, AWS CLI/GCP CLI automation.

Mobile Application Security

- Android reverse engineering, TLS pinning bypass, dynamic instrumentation.
- Frida, jadx, MobSF.

METHODOLOGIES

&

FRAMEWORKS

- CREST, CHECK-aligned testing, PTES, OWASP ASVS, OWASP Top 10, API Top 10.
- MITRE ATT&CK Enterprise, escalation path mapping.
- NIST 800-115, threat modelling, risk scoring.

TOOLING

EXPERTISE

Pentest: Burp Suite Pro, Nmap, Nessus, SQLmap, Feroxbuster, ffuf, Hydra
AD Ops: BloodHound, Mimikatz, Rubeus, Impacket, PowerView, CME
Infrastructure: Responder, Bettercap, Metasploit, Chisel, Ligolo-NG
Cloud: ScoutSuite, Pacu, AWS CLI, GCP CLI
Automation: Python, PowerShell, Bash

RESEARCH

&

CONTRIBUTIONS

- Published AD, cloud and web exploit chains with detailed business impact and end-to-end attack path analysis.
- Authored technical writeups, PoCs and methodology deep-dives on psykick.uk.
- Built custom reconnaissance and enumeration tooling for internal engagements.
